ARMSTRONG'S DECLARATION
IN OPPOSITION TO EX PARTE
APPLICATION FOR ORDER
STRIKING DECLARATION RE
SUMMARY ADJUDICATION

Date: 1/23/95
Time: 9:30 a.m.
Dept: One
Trial Date: May 18, 1995

DECLARATION OF GERALD ARMSTRONG

I, Gerald Armstrong, declare:

1. I am making this declaration in support of my opposition to Scientology's ex parte application for an order striking my supplemental declaration in opposition to its motion for summary adjudication.

2. Contrary to Scientology's view, my religious beliefs and its religious beliefs are central to this litigation. They are already a part of this Court's files and there is no way they can

*Handed to

1 be barred from the court or stripped from the court's files.

2 3. The OT III materials, although Scientology does trade on
3 them, are not secret. The story of Xenu, exactly as written by
4 Hubbard in the materials filed in this case, was also made by
5 Hubbard into a screen play he titled "Revolt in the Stars," which
6 I was given to proof read for him in 1977. Hubbard ordered that
7 this screen play be developed commercially, and he had it
8 distributed to movie producers for that purpose, a project in
9 which I was also involved. Thus Scientology's claim that people
10 can die from seeing the OT III materials before they have done the
11 "lower level auditing" is both silly and cruel.

12 4. I know personally 11 people outside Scientology's
13 control who possess copies of the OT III materials. It is widely
14 known that Scientology makes a fuss about their "upper level
15 materials," which have been widely distributed outside the
16 organization. The reasons for this fuss appear to be to give its
17 "scriptures" an appearance of religiosity and divert attention
18 from their actual contents which are anti-religious.

19 5. Appended hereto is a copy of the same OT III materials
20 which appeared on the Internet on October 18, 1994, and thus has
21 been distributed to millions of readers. These things are not
22 secret.

23 6. As to Exhibit M Scientology seeks to strike, L. Ron
24 Hubbard's bulletin "Why Thetans Mock Up," this has already been
25 filed in this case on December 9, 1994 in Michael Walton's
26 Evidence in Support of Opposition to to Plaintiff's Motion for
27 Leave to Complete Discovery. Scientology's attempts to have me
28

1 jailed on its concocted charges are part of this case and the
2 court's file; and so should be its motive for doing so.

3 I declare under the penalty of perjury under the laws of the
4 State of California that the foregoing is true and correct.

5 Executed at San Anselmo, California, on January 23, 1995

These are the OT III materials. Read further at your own risk.

OPERATING THETAN

Section Three

The head of the Galactic Federation (76 planets around larger stars visible from here) (founded 95,000,000 years ago, very space opera) solved overpopulation (250 billion or so per planet -178 billion on average) by mass implanting. He caused people to be brought to Teegeeack (Earth) and put an H-Bomb on the principal volcanoes (Incident II) and THEN the Pacific area ones were taken in boxes to HAWAII and the Atlantic area ones to LAS PALMAS and then re "packaged". His name was Xenu. He used renegades. Various misleading data by means of circuits etc. was placed in the implants. When through with his crime loyal officers (to the people) captured him after six years of battle and put him in an electronic mountain trap where he still is. "They" are gone. The place (Confederation) has since been a desert. The length and brutality of it all was such that this Confederation never recovered. The implant is calculated to kill (by pneumonia etc.) anyone who attempts to solve it. This liability has been dispensed with by my tech development.

One can freewheel through the implant and die unless it is approached as precisely outlined. The "freewheel" (auto-running on and on) lasts too long, denies sleep etc. and one dies. So be careful to do only Incidents I and II as given and not plough around and fail to complete onethetan at a time.

In December 1967 I knew someone had to take the plunge. I did and emerged very knocked out, but alive. Probably the only one ever to do so in 75,000,000 years. I have ALL the data now, but only that given here is needful.

One's body is a mass of individual thetans stuck to oneself or to the body.

One has to clean them off by running Incident II and Incident I. It is a long job, requiring care, patience and good auditing. You are running beings. They respond like any preclear. Some large, some small.

Thetans believed they were ONE. This is the primary error. Good luck.

①

* * *

For the purpose of clarity, by BODY THETAN is meant a thetan who is stuck to another thetan or body but is not in control.

A THETAN is, of course, a Scientology word using the Greek theta which was the Greek symbol for thought or life. An individual being such as a man is a thetan, he is not a body and he does not think because he has a brain.

A CLUSTER is a group of body thetans crushed or held together by some mutual bad experience.

CHARACTER OF BODY THETANS

Body thetans are just Thetans. When you get rid of one he goes off and possibly squares around, picks up a body or admires daisies. He is in fact a sort of cleared Being. He cannot fail to eventually, if not at once, regain many abilities. Many have been asleep for the last 75,000,000 years. A body Thetan responds to any process any Thetan responds to.

Some Body Thetans are suppressive. A suppressive is out of valence in R6. He is in a valence in Incident I almost always.

One can't run a human being on these two incidents since human beings are composites and would not be able to run the lot. Aside from that, non-clears are way below awareness required to even find these Incidents.

Huge amounts of charge have already been removed from the case AND the body thetans by Clearing and OT I and OT II to say nothing of engrams and lower grades.

Awareness is proportional to the charge removed from the case.

Although a human is a composite being there is only one I (that is you) who runs things.

Body thetans just hold one back.

You will continue to be you. You, inside, can of course separate out body thetans and so solo auditing is the answer. How good do you have to be to run body thetans off? Well, if you didn't skip your grades, Clearing and OT II particularly, you should be able to command body thetans easily.

②

* * *

Incident II is over 36 days long. Capture on other planets was weeks or months before the implant. Those on Teegeeack (Earth) were just blown up except for Loyal Officers who were (shortly before the explosion on Earth) rounded up.

Do not scan through the duration of 36 days. The volcanic explosion on Earth to the point where "the pilot" says he is mocking it up is only a few days.

Sequence of Incident II for thetans on ANOTHER planet -

- (1) Capture (being shot),
- (2) freezing,
- (3) transport to Teegeeack (sometimes via a relay point),
- (4) being placed near a volcano,
- (5) beginning implant up to "the pilot",
- (6) various picture sequences,
- (7) the 7s and C.C. and OT II materials,
- (8) 36 days of picture implants which give a vast array of materials and three explanations for the bombing,
- (9) transport to Hawaii or Las Palmas for packaging up into clusters.

The pictures contain God, the Devil, angels, space opera, theatres, helicopters, a constant spinning, a spinning dancer, trains and various scenes very like modern England. You name it, it's in this implant we call in its entirety "R6".

If one was a Loyal Officer on Teegeeack, the sequence was (1) capture (2) number 5 above on. If one was a citizen of Teegeeack there was only number 5 on.

The material given at the various "volcanoes" was no longer or shorter, but dovetailed into the same sequence of pictures. We have the whole text but it is needless.

People who feel dizzy have gotten into the spinning part.

* * *

Incident I occurred about 4 quadrillion years ago plus or minus. It is very much earlier than Incident II which occurred only 75 million years ago (a bit less).

Incident II is only peculiar and general on this planet and nearby stars, whereas Incident I is to be found on all thetans.

3

The Basic on BT's

I've isolated a way a thetan comes to be stuck to another thetan. This gives the basis of clusters and having BT's.

A thetan collides with another. That one makes a picture of being collided with. Other BT's get stuck to the picture.

The moment of actual contact of thetans was brief but the picture (containing a stop or withdraw) tends to be permanent.

Thetans then get the idea they can be permanently stuck as they see pictures of it happening.

Thus we get the concept of a "black theta body". This would be actual BT's stuck to a thetan plus pictures of BT's stuck to a thetan.

An answer to all this is to find the first picture a thetan made of contacting another thetan.

If not at once available the earliest instance of a thetan contacting (colliding, running into, attacking) another thetan could be achieved by R3R on being suddenly hit with clusters or strange beings.

The idea is to find and run the "first picture" one made of another thetan.

This opens another way to "blow off" BT's - run R3R on a BT to the first picture the BT ever made of another thetan.

Instructions

Locate by meter read or an area of pressure, a body thetan or group (cluster). Run Incident II. If the BT does not blow off or the group break up and blow, then run Incident I on individual BT's. Each will blow off with an F/N.

When you can find no more on which to run Incident I's, once more locate a pressure area or by meter read on looking over body run another Incident II. Then Incident I's on any.

Incident II made clusters of BT's. Severe impacts and experiences ALSO make clusters. (See the data called "Milazzo" in this pack.) Those who do not leave on running the impact or its chain will leave when Incident I is run on them.

Incident II sometimes forms gigantic clusters. In such there is a leader, an alternate leader and several (eight to eighteen) more. These were all implanted in different volcanic areas with fractions of the main 36 day implant and then "packaged" in Las Palmas or Hawaii. This if you run Incident II as far as "the pilot" it blows up or loosens up and those who don't go away can be run on Incident I's.

Do not speak your commands. Just "intend" them. A BT controls easily. BT's can be ARC broken by rough or careless auditing. You can also run an Incident II on a BT and he doesn't blow, but you accidentally run in Incident I on another one and leave the first still there. The remedy is to run Incident I's on anything you find.

A very SP BT can be run on grades and Power and should then respond to Incident II and Incident I.

After a BT leaves, some other BT may copy him or the incident just run.

If you have found a cluster (pressure area) that does not respond or disintegrate to Incident II running, get Dianetic auditing, listing "what impact or incident would cause a cluster?" and R3R on the items found. Then do more Incident I's to clean up the strays with solo. This is a refined "Milazzo".

There are hundreds of BT's you will find.

If you find none, get audited on Dianetics in general and as above (impact list), and if you still find none, get a review GF40 and handle all items, then go back to solo.

If you find only one or two, get the Dianetic impact list done.

All "none on OTIII" cases were later found loaded.

Do Incident II and Incident I's on what you can find to begin with. You will do fine. Good hunting.

* * *

Certain "buttons" have to be gotten in where running a thetan through incidents. The EFFORT TO STOP the motion hangs up the action and gives a stuck picture. One gets the EFFORT TO STOP off and the scene races through.

The EFFORT TO WITHDRAW is important also and hangs up the action and creates a vacuum.

RUSH, PROTEST, NOT-IS, SUPPRESS are also present.

These were actions - thoughts - the thetan had during the incident and are picked up only when the incident doesn't run well. Sometimes two "buttons" such as STOP and WITHDRAW are in combination.

Thetans in the body may obsessively copy the pictures of other thetans. Therefore you can find it seems that the thetan who just left is still there because there is a picture left. Spot the fact that someone else copied it and it usually goes.

If you do an S & D on a body thetan be sure you give the right item to the right thetan.

5

Cross Auditing

When one runs Incident I out of one thetan and then Incident II out of another (thinking it was the first one) one can get a partially run body thetan who won't blow, but who may start to go on through the whole of R6 automatically (since the basic-basic Incident I is not run, yet Incident II is). One can get quite ill doing this as the illness in R6 can turn on.

One can also "feel no wish to audit". All "no desire to audit" is some large blunder on a case.

The way you can run Incident I out of one thetan and Incident II out of another is rather easy. One fails to notice the first one blow on having Incident I run and runs Incident II on another.

* * *

As a matter of data, the only trouble in a III OT run is running an Incident I on one thetan and an Incident II on another, thinking it was the first one. A pre-OT can freewheel into R6 if you run only an Incident II. You can stop a freewheel at once by running Incident I off the same thetan you ran the Incident II on that started a freewheel.

Freewheel means that the PC goes on automatic continuous run. Incident II is R6 75,000,000 years ago. Incident I is about 4 quadrillion years ago. Both, all thetans on this planet and 21 nearby stars have in common. All thetans in the universe have Incident I. Only those in this old Confederation have Incident II and R6. All C.C. and OT II materials are in R6 75,000,000 years ago. These are followed by 36 days worth of motion pictures - God, Devil, space opera, trains, cars, helicopters, crashes, stage etc. This R6 is 75,000,000 years ago, and this planet and Confederation.

If the volcano bit is run as per III directions but the Incident I is not run on the same thetan, R6 begins to run off on automatic, the Being can't sleep for days, the body dies. That's the way it was designed.

Overrun on III

The only way you can get a read on "Overrun on III" is to have accidentally run Incident I out, and then later run it out again on the same thetan or make a similar blunder. Example: One flattens Incident I by several passes on a body thetan. This body thetan for some reason (Mostly because Incident II was then not run) does not fly off. Then, not noticing, one again finds the same thetan and once more seeks to run Incident I. One then gets, in answer to the question "Overrun on III?" a lot of reads and overrun phenomena.

The remedy is to find out WHO was overrun and get the charge off by that action.

One then runs Incident II on that thetan or in any event, by getting off the charge of "overrun", letting the thetan depart.

Just because one's meter reads "Overrun on III" is no reason

(6)

* * *

A BT can be overrun past erasure. This fact sometimes causes a solo auditor to believe OT III is overrun.

If he asks "Is OT III overrun?" he may get a read and blowdown. This is actually usually just one BT or cluster that is overrun. The remedy is discovering and indicating the point of overrun. And carry on with OT III.

Running OT III

When running OT III the solo auditor handles body thetans as he would any other PC, for the general idea is to run them standardly and not ARC break them. He does not scan through anything in order to find body thetans.

When a solo auditor can find no more body thetans he can attest, or run a pressure area down and handle as per his running instructions.

The pre-OT could be exterior and the Interiorization processes can be run in Review to help him through.

Here are three reasons why a pre-OT might have trouble whilst running BT's on Incident II -

- (1) It is the wrong area;
- (2) it is not the volcano of the BT being run;
- (3) it is not an Incident II, but another incident of a different date.

Check (1) and (2) if you are having any difficulty in running Incident II and handle by locating the correct area or finding the volcano of the BT being run. If it is not a II, simply check for the date and if different run it.

OT III Errors

Amongst OT III errors are "a BT run on Incident I fails to blow". There are three reasons:

(a) Auditor is trying to run a cluster with an Incident I. The right thing to do is date and get the character of the incident that made it a cluster and then run Incident I's on those left when it breaks up. Or get Dianetic auditing.

(b) There is an earlier Incident I on the same BT. Find it and run it. The BT has a chain of them all by himself.

(c) Another BT is copying the Incident I just run so it looks like it didn't blow. Failure to ever run Incident II can also cause a bog. Routine Dianetic auditing by a Dianetic HDG who is also on or above OT III using triple flows and LDN OT III also handles bogged OT III pre-OT's.

Cluster Formation - Cumulative

In doing a cluster one is likely to find it is made up of other earlier clusters. This looks like this. 1898 impact horse accident. When engram 1898 run on R3R, that part blows. No F/N occurs, TA remains up. Remainder will grind after the blow. Earlier portion dates as 93,000,000 years ago, electric shock. When run on R3R, that part blows, no F/N. TA remains up, will grind if run further. Earliest portion dates as 72 trillion implant. When run on R3R, all blow, F/N.

A cluster or engram which is a cluster can repeatedly F/N as BT's blow. Dates as 778 million explosion. After run once or twice an F/N occurs as one BT blows. Run again to second F/N as two more BT's blow. Remainder blow with a wider F/N. The cluster has gone. This happens (repeating F/N) when picture persists and meter check reveals it is not a copy. It will be more BT's in same cluster. So above repeating F/N occurs when pre-OT is moved through it. Clusters are found by meter dating, listing for type of incident and run as an engram. Clusters can occur at Incident II and Incident I. They can also occur at 1 quadrillion, which is the Clearing Course materials. They also occur at random dates for different reasons.

* * *

I have lately been C/Sing a number of failed OT cases and have found them all running well on solo now. The errors are made as follows:

- (1) The solo auditor cannot audit, needs more training.
- (2) Cases are not well prepared with Dianetics.

The remedy for all of these is to:

- (a) Run the PC for at least a score or two of Dianetic items by R3R, done of course by a good HDG,
- (b) then do a GF 40.

And then repeat it until necessary auditing is complete. These two actions take care of the majority of difficult cases on OT III.

The real End Phenomena of OT III and OT IV is exterior with full perception. You can and should accomplish full stable exteriorization on doing the materials of III.

Further III remedies:

- (3) High TA. This comes from not completing the Incidents I and II on body thetans.
- (4) The solo auditor puts too wide an intention on the BT and runs two or three when he is intending to run only one.
- (5) A cluster just won't break up. The remedy is a Dianetic session listing for impacts or incidents that would cause a cluster and doing R3R. The principle of earlier similar holds good. When this is completed, the solo auditor is sent back to solo to clean up the BT's shaken loose and to continue with OT III.
- (6) Rudiments go out on BT's. The remedy of course is to

(7) A theta-bopping meter sometimes puzzles a solo auditor on OT III. This means a BT is trying to exteriorize and can't. The remedy is to complete the partially run Incident II or Incident I or in extreme cases put the ruds in on the hung up BT.

(8) One-hand electrode giving wrong TA read baffling the solo auditor with floating needles with a high TA. The remedy is to have two-hand electrodes handy and trim the trim knob so the one-hand electrode reads the same as two-hand electrodes.

(9) A suppressive body thetan sometimes isn't auditable. The remedy is to run Grades IV or V on him.

(10) By far and large the corniest error and which has been very prevalent is not knowing the materials of OT III or the content of Incident II or Incident I.

OT III is a vital grade. One fronts up to it and does it. When he is really done, the rewards of OT III and IV exceed his wildest dreams.

Rudiments Going Out on BT's

When the ruds go out on BT's during the session the solo auditor recognizes the following:

BT critical = withhold from auditor

BT antagonistic = bypassed charge in session

No TA = problem

BT sad = ARC Break

Soaring TA = Overrun or protest (also more than one BT being run in error or it's a cluster)

Auditor tired = no sleep or incomplete Incident I's

Auditor dope-off = bypassed F/N or not enough sleep

Auditor no-interest = out ruds on BT's

A solo auditor who isn't sure what it is, but runs into trouble with a BT is smart to end off the session quickly, write down the full observation and get it to the C/S. The solo auditor who knows what he is looking at as per the above scale (and the C/S the C/S would give), handles it promptly.

BT critical = w/h = pull the withhold

BT antagonistic = BPC = assess proper list (such as L1C) and handle

No TA (or case gain) = problem = locate the problem and handle

BT sad = ARC Break = locate and handle itsa E/S itsa

Soaring TA = O/R or protest (also more than one BT being run in error or it's a cluster) = find which and handle (running more than the one intended comes from too wide an intention)

Auditor tired = no sleep or incomplete Incident I's = check which it is and handle

Auditor dope-off = lack of sleep or bypassed F/N = check on sleep or rehabilitate F/N

Auditor no-interest = out-ruds on BT's = put in ruds

9

OT III Auditing

OT III pre-OT's got a reputation of being hard to run on Dianetics early on in Dianetic re-development. Only five reasons exist for this.

- (1) A person that high on OT grades audits fast and a comm-laggy Dianetic auditor can drive him up the wall.
- (2) Too quiet or too blurred TR 1.
- (3) A tendency to evaluate instead of using TR 4.
- (4) The numerousness of BT chains on the same item (the BT's being separated now) making several chains on the same item, which if not all run separately leave the PC ARC Broken with the bypassed charge of unrun BT's.
- (5) The OT II who is still on OT III and has been on it a while probably himself has no pictures and all the pictures he has are BT pictures.

The lower grades PC (before Clear) reacts as a composite Being, all on one chain, so to speak. He is separated into himself and the individual BT's and clusters of them when he gets to OT II, and so audits differently. He easily misowns the pictures thinking they are his. The big blowdowns you get on such a PC's item indicates several BT's have it in common. A solo III however will be found to have the same item on more than one BT in many cases.

The reason for low TA is unflat OT III phenomena. If a person has had a low TA in lower grades the keynote is to take it easy as auditor and C/S. This applies also to any auditing given on upper OT levels.

That a PC's TA goes below 2.0 is a certain indicator of unflat OT III. He's still got some. When a person cannot handle OT III he is too much at effect. He cannot project his intention. And so he can't run OT III. The new OT I and OT II, particularly OT II, are designed to increase a PC's ability to project his intention to others. If he can't, they overwhelm him and you get low TA or "none on III". Harsh, overbearing auditing or life incidents have to occur, apparently, to drive the TA down.

Overts, disagreements expressed as obsessive agreement and other lower level matters are at the bottom of this in any Being.

But any case of low TA I have ever found has been:

- (1) Overwhelmed in life;
- (2) unable to project intention;
- (3) physically inactive;
- (4) loaded with BT's;
- (5) tends to go out of valence easily.

In all this number (4) is the important point.

Endless OT III and low TA are alike - inability to project intention, PC at effect. Remedy by lightly causing PC to come to cause, to be able to project his intention and thus flatten OT III. That will complete and finish off low TA.

* * *

It does not matter whether or not you ran Incident I and II on self. The End Phenomena of III is getting rid of all body thetans. This does not necessarily include self. If you overrun III it will be by trying to get rid of more body thetans than there were or by then, having got rid of the others, starting in on self. So III is complete for purposes of overrun as above. If you have not done Incident I and II on self when above is achieved, attest completion and then do I and II on self.

EP's

No BT's left = OT III
Exterior = OT IV

List of Volcanoes

There were two zones of assembly after the thetan was implanted. Thetans of volcanoes in Asia and the Pacific were taken to Hawaii. Thetans of Atlantic areas were taken to Las Palmas.

Asia and the Pacific

North Japan	Mt. Shasta
South Japan	San Gorgornio
Krakajawia	Indonesia
Mount Washington	Philippines
Mount Ranier	Himalayas
Mount Hood	(Hawaii)
	Andes

Atlantic

Tangier	(Las Palmas)
St. Helena	Canada
Kolomonjero	

(Spelling not guaranteed)
(List may be incomplete)

(11)

Incident II

75,000,000 years ago on this planet. Sometimes capture was on another planet and explosion on this planet, then called Teegeeack. Locate area of explosion. Pictures of explosion follow it. Get original explosion. Effort to stop usually present.

H-BOMB DROPPED ON VOLCANO
EXPLOSION
TERRIFIC WINDS
THETAN CARRIED OVER PEAK
ELECTRONIC RIBBON CAME UP
HE STUCK TO IT
IT WAS THEN PULLED DOWN AND HE WAS (AS PART OF A GROUP)
IMPLANTED WITH R6
PICTURE OF PILOT SAYING HE IS MOCKING IT UP

(R6 materials follow, then days of pictures of God, Devil, etc.)

(Thetan usually cognites on pilot or before (or on first incident) and leaves.)

Incident I

Occurs at start of track (4 quadrillion years ago).

LOUD SNAP
WAVES OF LIGHT
CHARIOT COMES OUT, TURNS RIGHT AND LEFT
CHERUB COMES OUT
BLOWS HORN, COMES CLOSE
SHATTERING SERIES OF SNAPS
CHERUB FADES BACK (RETREATS)
BLACKNESS DUMPED ON THETAN

Effort to stop must be gotten off (sometimes to hurry). Run as an engram.
